July 19 & 20, 2019

Friday 4:00 P.M. - 8:30 P.M.
Saturday 8:30 a.m. - 4:00 p.m.
Leon & Margaret Hershberger live on a 50 acre farm where they raise organic cash crops and build soil fertility using their soil fertility products and Kwazar sprayers. Their goal is to help you raise organic cash crops and build soil fertility

---

**Keynote Presentation**

*Family Values of Working with the Land*

by Leon Hershberger from Holton, MI Saturday at 12:15 P.M.

Leon & Margaret Hershberger live on a 50 acre farm where they raise organic cash crops and build soil fertility using their soil fertility products and Kwazar sprayers. Their goal is to help gardeners and growers produce high quality vegetables that are nutrient dense and bursting with flavor.

---

**Ongoing Demonstration**

**Horse Training**

Effectively Communicating Between Horse & Human

by Fernan Wingard

---

**Mission Statement**

Our mission is to continue to provide educational format for grass based agriculture that...

- supports low energy and a non-industrial way of farming
- encourages family lifestyles that promote cohesive economical, and healthy rural living skills
- and seeks to build morale and enthusiasm in the farming community

The Field Day is being planned by the Family Farm Field Day Committee. We invite you to join us for demonstrations, presentations, discussions, sessions and sponsor’s displays.

There is no reservation or entrance fee for the day’s activities. The food stands will be by the parochial school’s special education parents. There will be containers for a freewill offering if you would like to contribute toward the furtherance of the Family Farm Field Day. Sessions will be running simultaneously. Planned children’s activities will be offered throughout the day. They will include demonstrations, hands-on experiences and lots of age-appropriate activities.
